

Top Flap

Back

Cut out packets on solid outside line.

Fold toward unprinted back side on dashed lines.

Put glue on "Glue Flaps" and press the back side of the packet onto the flaps.

Fold the top flap over toward the back.

When you have placed seeds in the packet, you can seal the flap with a bit of tape or a little sticker.

Be sure and write down what kind of plant the seeds came from and note any information that will help you next season when you plant them.
